## Data Column Specification

| Column Name   | Data Type | Description                                                                                                                                                                                                                                                                                                              |
|---------------|-----------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| MonitorID     | Int64     | Identifier for the individual.                                                                                                                                                                                                                                                                                           |
| DiaryID       | Int64     | Identifier for the trip date.                                                                                                                                                                                                                                                                                            |
| TripID        | Int64     | Identifier for the trip.                                                                                                                                                                                                                                                                                                 |
| Mode          | Int64     | Transportation mode code. Values: 100 = rail, 101 = subway, 103 = monorail, 200 = streetcar, 201 = bus, 300 = car, 301 = truck, 302 = taxi, 303 = motorcycle, 400 = bicycle, 401 = shared bicycle, 402 = velotaxi, 500 = walking, 600 = airplane, 601 = ship, 602 = other; 999 = unknown.                                |
| Purpose       | Int64     | Trip purpose code. Values: 100 = commuting or schooling, 200 = business, 201 = returning to workplace or school, 300 = returning home, 400 = shopping, 401 = dining, 402 = lessons, 403 = hospital visit, 404 = leisure, 405 = sightseeing, 406 = strolling, 407 = escorting, 500 = waiting, 501 = other; 999 = unknown. |
| LinkID        | Int64     | Unique ID of the link traveled.                                                                                                                                                                                                                                                                                          |
| Link_Dep_Time | String    | Japan Standard Time (JST).                                                                                                                                                                                                                                                                                               |

| Column Name    | Data Type | Description                           |
|----------------|-----------|---------------------------------------|
| Travel_Time(s) | Float64   | Travel time in seconds.               |
| Speed(km/h)    | Float64   | Average speed in kilometers per hour. |
| Link_Cost      | Int64     | Cost of traveling along the link.     |
| Link_Length(m) | Float64   | Length of the link in meters.         |

---

### Hash Value (BLAKE3)
